## Cabinetry Doors from **polytec**

**polytec**, the leader in Australian decorative surfaces, is pleased to extend its popular door products to the New Zealand market.

The range, specifically curated for the New Zealand market, meets the demand for more flexible and creative options.

The **polytec** doors range includes:

- **Surano doors**  
A 5-piece decorative door with insert options in both decorative board or glass.
- **Vista doors**  
A multipiece door with a 20mm rail and insert options from our 16mm decorative range.

Explore the full **polytec** range.

## Surano Doors

**polytec** Surano 5-piece doors can be used for a wide range of applications, adding an element of luxe character to your space. This shaker style door, using joinery, glued and dowelled together into a multi-piece construction, ensures strength and stability.

Available in all our 18mm Woodmatt and Ravine colours, doors are 18mm thick with a 9mm matched or contrasting decorative insert or your choice of a feature glass. Options for glass include fluted, etched, mirror and more.

You can be bold, classic, or minimal with Surano doors, creating a modern nostalgic feel in any space.

- 18mm thickness with 60mm rail
- Impact resistant to everyday knocks and bumps
- Glued and dowelled joints ensuring strength and stability
- 9mm matching or contrast insert
- Glass insert options include fluted, frosted and mirror
- Maximum size of 2800mm high by 1200mm wide

**Please note:** (1) Drawings are for illustrative purpose only, and are not true to scale. (2) Grain direction will always be horizontal through the top and bottom rails, and vertical through the side rails and centre panel. (3) Individual drawers and drawer bank inserts and rails will not be grain matched. (4) Full Rail Drawers to be ordered as Doors.

## Vista Doors

New to the market, the Vista door is a multipiece door using a 16mm decorative centre panel with a slim 20mm wide rail that is right on trend. Doors are 21mm thick with mitred corners.

There are seven popular timber colours that can be used for the feature rail with matching insert. Create a feature by choosing a contrasting insert from any of our 16mm matt colours – there are more than 25 to choose from.

- Doors are 21mm thick with a 20mm rail
- Seven rail options from our popular Woodmatt range
- Inserts can be matched to the rails or contrasted with any of our 16mm matt range
- Maximum size of 2800mm high by 1200mm wide
- Vista door frame colours match with our easyLINING profile wall range or our Steccawood decorative batten range

## Environment & Sustainability

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

**polytec** are striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018 over 46,000 solar panels across the network of facilities have been installed.

The Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

## Care & Maintenance

**polytec** do not recommend the use of Decorative 18mm and 16mm products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted. Some decorative 18mm and 16mm products are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

Your Decorative 18mm and 16mm products are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Decorative 18mm and 16mm products should be cleaned by wiping down with a damp soft cloth and warm soapy water. Followed by drying using a soft or microfibre cloth so as not to leave any residue. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit [polytec.co.nz](http://polytec.co.nz) for specific care and cleaning information.

## Important

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [polytec.co.nz](http://polytec.co.nz)

**polytec** swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [polytec.co.nz](http://polytec.co.nz)

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
